

QMASK

INCREASED PROTECTION ANTIBACTERIAL FACE MASK

COMFORTABLE FIT
3D TECHNOLOGY KNITTING.

This mask has been engineered to increase your resistance to harmful viruses and bacteria. The new technology built into this unique product adds further protection by use of a changeable Antibacterial filter which inhibits bacteria from multiplying. The dual action combines mechanical fibre filtering and the Antibacterial to reduce the risk of infection. These masks are machine washable and therefore are freshly sanitised after each wash.

Remove filter before wash and add new filter after drying

- With Lyrca.
